

TAYLOR & FRANCIS ONLINE JOURNALS

TITLE	COVERAGE	DESCRIPTION
MULTI-DISCIPLINARY		
Annals of GIS	1995-Current	Annals of GIS is an international peer-reviewed journal that encourages the interdisciplinary exchange of original ideas on theory, methods, development and applications in the fields of geo-information science.
Annals of the American Association of Geographers	1911-Current	The Annals of the American Association of Geographers was first published in 1911. It is recognized as the Association's premier journal for major research articles for all fields of geography.
Asian Geographer	1991-2016	Asian Geographer disseminates knowledge about geographical problems and issues focusing on Asia and the Pacific Rim. Papers dealing with other regions should have a linkage to Asia and the Pacific Rim. Original and timely articles dealing with any field of physical or human geographical inquiries and methodologies will be considered for publication. We welcome, for example, submissions on people-environment interactions, urban and regional development, transport and large infrastructure, migration, natural disasters and their management, environment and energy issues.
Australian Planner	1958-2016	Australian Planner provides a forum for planning news, opinion and research and each edition of the journal contains a component surrounding a particular theme or topic of interest. Australian Planner has become a well respected publication and a very popular source of knowledge and information for professional planners and those involved in the built environment.
Building Research & Information (BRI)	1973-Current	BUILDING RESEARCH & INFORMATION (BRI) focuses on buildings, building stocks and their supporting systems. Unique to BRI is a holistic and transdisciplinary approach to buildings, which acknowledges the complexity of the built environment and other systems over their life.
City	1996-2016	City is a journal of provocative, cutting-edge and committed insights into, analysis of, and commentary on the contemporary urban world. We record and analyse 'the city', cities and their futures, and urbanization from multiple perspectives including: the information and digital revolutions, war and imperialism, neoliberalism and gentrification, environment and sustainability, resistance and social movements, regeneration, resurgence and revanchism, race, class and gender, multi-culturalism and post-colonialism. City combines an analysis of trends, culture, policy and action, and features both historical and theoretical work alongside detailed case studies, policy commentary and open debate.
Community Development	1970-Current	Community Development is devoted to improving knowledge and practice in the field of purposive community change. The mission of the journal is to advance critical theory, research, and practice in all domains of community development, including sociocultural, political, environmental, and economic.
Conflict, Security & Development	2001-Current	Conflict, Security and Development bridges traditional development and security studies through its focus on cross-cutting policy agendas, and also establishes connections with related disciplines, including anthropology, political economy and regional studies. The journal fills this analytical gap with fresh, objective and intellectually provocative research and also offers a forum for the cross-fertilisation of ideas and for reasoned and rigorous debate between the academic and policy communities in the North and South.
Contemporary Social Science: Journal of the Academy of Social Sciences	2006-2016	This interdisciplinary, cross-national journal provides a forum for disseminating and enhancing theoretical, empirical and/or pragmatic research across the social sciences and related disciplines. Reflecting the objectives of the Academy of Social Sciences, it emphasises the publication of work that engages with issues of major public interest and concern across the world, and highlights the implications of that work for policy and professional practice.

Development in Practice	1991-Current	Development in Practice offers practice-based analysis and research relating to development and humanitarianism providing a worldwide forum for the exchange of ideas and experiences among practitioners, scholars, policy shapers, and activists. By challenging current assumptions, and by active editorial engagement with issues of diversity and social justice, the journal seeks to stimulate new thinking and ways of working.
Development Studies Research	2014-2016	Development Studies Research (DSR) is a multidisciplinary journal providing an interdisciplinary platform for original, critical research. The journal aims to broaden understandings of current development studies research, open up new areas of debate, reflect on and advance development theory, identify problems of policy and practice, and present potential solutions and recommendations to the development community, private sector and conservationists.
disP - The Planning Review	1980-2016	disP - The Planning Review is an interdisciplinary scientific journal, which addresses topics in the areas of Urban Development, City and Town Planning, Landscape and Environmental Planning, Landscape Architecture, Regional and Environmental Economics as well as Transportation Planning. Normally two disP issues a year are dedicated to a specific theme. Articles are published in German, English, French or Italian. An English summary is provided for each article published in another language.
Economic History of Developing Regions	1986-2016	The focus of this journal is from disciplines such as general history, development economics, cliometrics, business history, labour history, financial history, development studies and others.
European Planning Studies	1993-Current	European Planning Studies provides a forum for ideas and information about spatial development processes and policies in Europe. The journal publishes articles of a theoretical, empirical and policy-relevant nature and is particularly concerned to integrate knowledge of processes with practical policy proposals, implementation and evaluation. Articles of particular interest to the journal focus upon specific spatial development problems, as well as emerging explanations of new urban, regional, national or supranational developmental tendencies.
Fabrications	1997-Current	Fabrications is the refereed journal of the Society of Architectural Historians, Australia and New Zealand. Established in 1989, it is devoted to scholarly publication in the field of architectural history. It particularly welcomes papers on the architectural, urban and landscape history of Australia, New Zealand, the South Pacific and South-East Asian regions, while casting its net much further afield. The journal publishes refereed papers, academic essays and book reviews that are both concerned with these regions and papers which take a wider view of international questions or issues.
Forum for Development Studies	1992-Current	Forum for Development Studies aims to be a platform for development research broadly defined – including the social sciences, economics, history and law.
Globalizations	2004-Current	Globalizations seeks to publish the best work that contributes to constructing new meanings of globalization, brings fresh ideas to the concept, broadens its scope, and has an impact upon shaping the debates and practices of the future. The journal is dedicated to opening the widest possible space for discussion of alternatives to narrow understandings of global processes and conditions.
Impact Assessment of Project Appraisal	1998-Current	Impact Assessment and Project Appraisal (IAPA) is an international refereed journal and is the official publication of the International Association for Impact Assessment (www.iaia.org). The editors welcome a diverse range of papers, including multi-author and interdisciplinary papers, that focus on the environmental, social, health, sustainability, and/or other assessments of projects, programmes, plans and policies. IAPA is aimed at readers in universities, government and public agencies, consultancies, NGOs and community groups.
Information Technology for Development	1986-2016	It publishes social and technical research on the effects of Information Technology (IT) on economic, social and human development.

International Journal of Housing Policy	2001-Current	International Journal of Housing Policy is a leading forum for the critical analysis of housing policy, systems and practice from a social science perspective
International Journal of Sustainable Building Technology and Urban Development	2010-2016	The International Journal of Sustainable Building Technology and Urban Development aims to support its academic community by disseminating studies on sustainable building technology, focusing on issues related to sustainable approaches in the construction industry to reduce waste and mass consumption, integration of advanced architectural technologies and environmentalism, sustainable building maintenance, life cycle cost (LCC), social issues, education and public policies relating to urban development and architecture .
International Journal of Sustainable Development and World Ecology	1994-Current	The International Journal of Sustainable Development and World Ecology is now over fifteen years old and has proved to be an exciting forum for understanding and advancing our knowledge and implementation of sustainable development.
International Journal of Urban Studies	1998-Current	International Journal of Urban Sciences (IJUS) is an interdisciplinary journal for scientific research and analytical methods on urban and regional studies. IJUS welcomes submissions in the areas of planning, transportation, economics, environment and geography, particularly those that consider the spatial context and focus on issues of theory, method, and public policy.
International Journal of Urban Sustainable Development	2010-Current	International Journal of Urban Sustainable Development aims to provide a forum for cutting edge research and rigorous debate for in-depth and holistic understanding of the complex inter-related environmental, social, economic, political, spatial, institutional and physical challenges facing urban areas. Its premise is that multi-disciplinary approaches provide the space for the range of disciplines and perspectives related to the full breadth of issues that affect urban sustainable development. The journal also aims to enhance knowledge and understanding of the two-way interactions between urbanization processes and patterns and environmental changes at the local, regional, and global scales. In addition to mitigation and adaptation concerns these also include related social and economic issues such as the impacts of globalisation and financial crises, evidence-based liveability versus utopian planning principles, restoring dignity to the marginalized beyond mere participation, environmental justice and sustainable resource utilisation.
International Planning Studies	1996-2016	International Planning Studies (IPS) addresses these issues by publishing quality research in a variety of specific fields and from a range of theoretical and normative perspectives, which helps improve understanding of the actual and potential role of planning and planners in this context. Planning, at the urban, regional, and national and international levels, faces new challenges, notably those related to the growth of globalisation as both an objective socio-economic process and a shift in policy-maker perceptions and modes of analysis.
Journal of Architecture and Urbanism	2006-2016	The Journal of Architecture and Urbanism is a peer-review academic journal which publishes original research papers. The journal presents new results of research and provides a forum for discussion and debate relating to numerous areas of architecture and urbanism. The topics include: urban design and planning; sustainable development of regional structures; history and theory of architecture and urban planning; history and theory of landscape architecture; protection of architecture and urban heritage; technologies of architecture and urban design; architectural education.
Journal of Cultural Geography	1980-Current	Since 1979 this lively journal has provided an international forum for scholarly research devoted to the spatial aspects of human groups, their activities, associated landscapes, and other cultural phenomena.
Journal of Environmental Engineering and Landscape Management	2004-Current	The Journal of Environmental Engineering and Landscape Management is an international medium for the publication of original research on the environment with emphasis on changes caused by human activities and international research towards sustainability. The scope is multidisciplinary and international and the

		subjects covered include atmosphere and air pollution control and pollution mitigation technologies, water pollution control and pollution mitigation technologies, soil pollution control and pollution mitigation technologies, entrails of the earth, their protection, waste management, zero-waste technologies, environmental expertise, control over physical and technological environmental impacts and reduction technologies, nuclear hydro physics and radioactive pollution, modelling environmental processes, environmental monitoring, landscape protection, environmental ethics, environmental law and management, quality of indoor and outdoor environment. Besides, it publishes short reports and observations, reviews and bibliography, reports on conferences and workshops.
Journal of Environmental Planning and Management	1948-Current	Journal of Environmental Planning and Management has established itself as a leading international forum for scholarly but accessible papers on all aspects of environmental planning and management.
The Journal of International Trade & Economic Development	1992-Current	The Journal of International Trade and Economic Development (JITED) focuses on international economics, economic development, and the interface between trade and development. The links between trade and development economics are critical at a time when fluctuating commodity prices, ongoing production fragmentation, and trade liberalisation can radically affect the economies of advanced and developing countries.
Journal of Land Use Science	2006-Current	The Journal of Land Use Science provides a central outlet for high-quality articles on theoretical and empirical aspects of land-use science at the interface of social and environmental systems. The Journal brings together an array of research perspectives at multiple temporal, spatial and social scales that contribute a better understanding of land-system dynamics and communicate scientific advances towards attaining land-system sustainability.
Journal of Urban Design	1996-Current	The Journal of Urban Design is a scholarly international journal which advances theory, research and practice in urban design. The Journal publishes original articles in specialised areas such as urban aesthetics and townscape; urban structure and form; sustainable development; urban history, preservation and conservation; urban regeneration; local and regional identity; design control and guidance; property development; practice and implementation.
Journal of Urban Technology	1992-2016	The Journal of Urban Technology publishes articles that review and analyze developments in urban technologies as well as articles that study the history and the political, economic, environmental, social, aesthetic, and ethical effects of those technologies.
Journal of Urbanism: International Research on Placemaking and Urban Sustainability	2008-Current	The Journal of Urbanism is a multi-disciplinary journal that focuses on human settlement and its relation to the idea of sustainability, social justice and cultural understanding. It is concerned with the relative impact of design on environmental perception, urban livability and the experience of space.
Journal of the American Planning Association (JAPA)	1935-Current	JAPA publishes only peer-reviewed, original research and analysis. It aspires to bring insight to planning the future, to air a variety of perspectives, to publish the highest quality work, and to engage readers. APA is interested in manuscripts that examine historical or contemporary planning experience, broadly defined, in domestic or global contexts.
The London Journal	1975-Current	The Journal is multi-disciplinary and is intended to interest all concerned with the understanding and enrichment of London and Londoners: historians, geographers, economists, sociologists, social workers, political scientists, planners, educationalist, archaeologists, conservationists, architects, and all those taking an interest in the fine and performing arts, the natural environment and in commentaries on metropolitan life in fiction as in fact.
Migration and Development	2012-Current	Migration & Development invites contributions to highlight the various facets of international migration beyond the conventional lines such as the migration-development nexus, to borderless migration, refugees, return migration, labour laws, policy changes and the implications of all of them for both the

		sending and receiving countries.
Middle East Development Journal	2009-2016	The Middle East Development Journal aims to deepen understanding of development in the Middle East and North Africa and strengthen the social science research community in the region. The journal emphasizes research falling under the heading of applied economics, although theoretical papers and contributions from related disciplines such as political science and sociology are also considered. Submissions are actively sought from scholars within the region as well as worldwide. The ultimate goal of the journal is to contribute to the formulation of policy through the provision of world-class analytical and empirical research.
Oxford Development Studies	1972-Current	Oxford Development Studies is a multidisciplinary academic journal aimed at the student, research and policy-making community, which provides a forum for rigorous and critical analysis of conventional theories and policy issues in all aspects of development, and aims to contribute to new approaches. It covers a number of disciplines related to development, including economics, history, politics, anthropology and sociology, and will publish quantitative papers as well as surveys of literature.
Planning & Environmental Law: Issues and decisions that impact the built and natural environments	1949-2014	Formerly known as Land Use Law & Zoning Digest (1974-2003) & Zoning Digest (1948-1973)
Planning Perspectives	1986-Current	Planning Perspectives is the premier international journal of history, planning and the environment.
Planning Practice & Research	1986-Current	Planning Practice & Research (PPR) has established itself as the source for information on current research in planning practice. It is intended for reflective, critical academics, professionals and students who are concerned to keep abreast of and challenge current thinking. PPR is committed to: (1) bridging the gaps between planning research, practice and education, and between different planning systems, (2) providing a forum for an international readership to discuss and review research on planning practice, (3) the critical evaluation of practice and the progressive search for practical guidance, and (4) presenting research in an accessible, succinct style, not overly theoretical, but analytical.
Planning Theory & Practice	2000-Current	Planning Theory & Practice provides an international focus for the development of theory and practice in spatial planning and a forum to promote the policy dimensions of space and place.
Regional Studies	1967-Current	Regional Studies is a leading international journal covering the development of theories and concepts, empirical analysis and policy debate in the field of regional studies. The journal publishes original research spanning the economic, social, political and environmental dimensions of urban and regional (subnational) change. The distinctive purpose of Regional Studies is to connect insights across intellectual disciplines in a systematic and grounded way to understand how and why regions and cities evolve. It publishes research that distils how economic and political processes and outcomes are contingent upon regional and local circumstances. The journal is a pluralist forum, which showcases diverse perspectives and analytical techniques.
Regional Studies, Regional Science	2014-Current	Regional Studies, Regional Science particularly welcomes submissions from authors working on regional issues in geography, economics, planning, and political science.
Social Cultural Geography	2000-Current	Social & Cultural Geography publishes original, high caliber, scholarly articles on the spatialities of society and culture. Its articles are especially focused on space, place and nature in relation to social and/or cultural issues, including inequalities, poverty, housing, crime, work, and leisure; as well as everyday life, consumption, identity, community and neighbourhood (and their historic legacies).
Space & Polity	1997-Current	Space & Polity is a fully refereed scholarly international journal devoted to the theoretical and empirical understanding of the changing relationships between the state, and regional and local forms of governance. The journal provides a forum aimed particularly at bringing together social scientists currently

		working in a variety of disciplines, including geography, political science, sociology, economics, anthropology and development studies and who have a common interest in the relationships between space, place and politics in less developed as well as the advanced economies.
Spatial Economic Analysis	2006-Current	Spatial Economic Analysis is a pioneering economics journal dedicated to the development of theory and methods in spatial economics, published by two of the world's leading learned societies in the analysis of spatial economics, the Regional Studies Association and the British and Irish Section of the Regional Science Association International. A spatial perspective has become increasingly relevant to our understanding of economic phenomena, both on the global scale and at the scale of cities and regions. The growth in international trade, the opening up of emerging markets, the restructuring of the world economy along regional lines, and overall strategic and political significance of globalization, have re-emphasised the importance of geographical analysis. Spatial variations in economic development within cities and regions are also highly topical subjects for intellectual enquiry and have long been the focus of policy initiatives by national, regional and local governments.
Technological and Economic Development of Economy	2004-Current	The Journal is designed for publishing articles in the following fields of research: systems for sustainable development, policy on sustainable development, legislation on sustainable development, strategies, approaches and methods for sustainable development, visions and scenarios for the future, institutional change and sustainable development, alternative economic paradigms for sustainable development, assessment of environmental impact, and etc.
Territory, Politics , Governance	2013-Current	This journal creates a platform on which to explore the interface between territory, politics, economy, identity and the organisation of political space. It confronts topical and emergent issues of world economic and political concern.
Third World Quarterly	1979-Current	TWQ is a peer-reviewed journal that looks beyond strict "development studies", providing an alternative and over-arching reflective analysis of micro-economic and grassroot efforts of development practitioners and planners. It furnishes expert insight into crucial issues before they impinge upon global media attention.
Urban Geography	1980-Current	Urban Geography publishes original papers on problem-oriented current research by geographers and other social scientists on urban policy; race, poverty, and ethnicity in the city; international differences in urban form and function; historical preservation; the urban housing market; and provision of services and urban economic activity. Included in most issues are review papers and special features.
BUILT ENVIRONMENT		
Australasian Journal of Environmental Management	1994-Current	The Australasian Journal of Environmental Management is published four times a year (March, June, September and December) and addresses general issues of policy and practice in resource and environmental management. The focus is on Australian and New Zealand practice, but articles covering relevant international perspectives are welcome.
Building Research & Information	1973-Current	BUILDING RESEARCH & INFORMATION (BRI) focuses on buildings, building stocks and their supporting systems. Unique to BRI is a holistic and transdisciplinary approach to buildings, which acknowledges the complexity of the built environment and other systems over their life.
Climate and Development	2009-Current	Climate and Development is the first academic journal dedicated to the range of issues that arise when climate variability, climate change and climate policy are considered along with development needs, impacts and priorities. It makes complex analysis of climate and development issues accessible to a wide audience of researchers, policymakers and practitioners, and facilitates debate between the diverse constituencies active in these fields throughout the world.

European Journal of Environmental and Civil Engineering	1997-Current	The prime objective of the EJECE is to fully document advances in European scientific and technical research in the fields of sustainable construction and environmental engineering. In particular regard to the latter, the environmental preservation of natural media (soils and rocks) and the mitigation of soil pollutions, natural and technological risks are now not only major societal challenges, but they are also the source of scientific and technical developments that could be extremely beneficial.
Human and Ecological Risk Assessment : An International Journal	1995-Current	Human and Ecological Risk Assessment provides a resource for professionals researching and assessing environmental hazards to both humans and ecological systems.
International Journal of Sustainable Building Technology and Urban Development	2010-2016	The International Journal of Sustainable Building Technology and Urban Development aims to support its academic community by disseminating studies on sustainable building technology, focusing on issues related to sustainable approaches in the construction industry to reduce waste and mass consumption, integration of advanced architectural technologies and environmentalism, sustainable building maintenance, life cycle cost (LCC), social issues, education and public policies relating to urban development and architecture .
Journal of Environmental Engineering and Landscape Management	2004-Current	The Journal of Environmental Engineering and Landscape Management is an international medium for the publication of original research on the environment with emphasis on changes caused by human activities and international research towards sustainability. The scope is multidisciplinary and international and the subjects covered include atmosphere and air pollution control and pollution mitigation technologies, water pollution control and pollution mitigation technologies, soil pollution control and pollution mitigation technologies, entrails of the earth, their protection, waste management, zero-waste technologies, environmental expertise, control over physical and technological environmental impacts and reduction technologies, nuclear hydro physics and radioactive pollution, modelling environmental processes, environmental monitoring, landscape protection, environmental ethics, environmental law and management, quality of indoor and outdoor environment. Besides, it publishes short reports and observations, reviews and bibliography, reports on conferences and workshops.
Science and Technology for the Built Environment	1995-Current	Science and Technology for the Built Environment, ASHRAE's archival research publication offers comprehensive reporting of original research in science and technology related to the stationary and mobile built environment
Society and Natural Resources	1988-Current	Society and Natural Resources publishes a broad range of social science research and thinking on the interaction of social and bio-physical processes, policies and practices occurring around the world and at multiple scales. These involve attention to cultural, psychological, economic and political perspectives relating to forests, oceans, fisheries, soils, and water; and address a variety of topics such as people and protected areas/biodiversity conservation, globalization and capitalism, environmental justice, place/community-based conservation, community resilience, adaptive and collaborative management, sustainability, climate change, environmental attitudes and concerns, environmental hazards and risks, and human-nature relationships.
ENVIRONMENT		
Biodiversity	2000-2016	Biodiversity aims to provide an international forum on all matters concerning the integrity and wellness of ecosystems, including articles on the impact of climate change, conservation management, agriculture and other human influence on biodiversity.
Climate Policy	2001-Current	Climate Policy is a world leading peer-reviewed academic journal publishing high quality policy research and analysis on all aspects of climate policy, including policy and governance, adaptation and mitigation, policy design and development and programme delivery and impact.

Environment: Science and Policy for Sustainable Development	1959-Current	Environment: Science and Policy for Sustainable Development analyzes the problems, places, and people where environment and development come together, illuminating concerns from the local to the global.
Environmental Communication	2007-Current	Environmental Communication is an international, peer-reviewed forum for multidisciplinary research and analysis assessing the many intersections among communication, media, society, and environmental issues. These include but are not limited to debates over climate change, natural resources, sustainability, conservation, wildlife, ecosystems, water, environmental health, food and agriculture, energy, and emerging technologies. Submissions should contribute to our understanding of scientific controversies, political developments, policy solutions, institutional change, cultural trends, media portrayals, public opinion and participation, and/or professional decisions. Articles often seek to bridge gaps between theory and practice, and are written in a style that is broadly accessible and engaging.
Environmental Claims Journal	1998-Current	The Environmental Claims Journal is a quarterly journal that focuses on the many types of claims and liabilities that result from environmental exposures. The ECJ considers environmental claims under older business insurance policies, coverage and claims under more recent environmental insurance policies, as well as toxic tort claims. Exposures and claims from all environmental media are considered: air, drinking water, groundwater, soil, chemicals in commerce and naturally occurring chemicals. The journal also considers the laws, regulations, and case law that form the basis for claims. The journal would be of interest to environmental and insurance attorneys, insurance professionals, claims professionals, and environmental consultants.
Environmental Education Research	1995-Current	Environmental Education Research is an international refereed journal which publishes papers and reports on all aspects of environmental education. The purpose of the journal is to help advance understanding of environmental and sustainability education through a focus on papers reporting research and development activities.
Environmental Hazards	1999-Current	Environmental Hazards: Human and Policy Dimensions is an innovative, interdisciplinary and international research journal addressing the human and policy dimensions of hazards. The journal addresses the full range of hazardous events from extreme geological, hydrological, atmospheric and biological events, such as earthquakes, floods, storms and epidemics, to technological failures and malfunctions, such as industrial explosions, fires and toxic material releases. Environmental Hazards: Human and Policy Dimensions is the source of the new ideas in hazards and risk research.
Environmental Sociology	2015-Current	Environmental Sociology is dedicated to applying and advancing the sociological imagination in relation to a wide variety of environmental challenges, controversies and issues, at every level from the global to local, from 'world culture' to diverse local perspectives. As an international, peer-reviewed scholarly journal, Environmental Sociology aims to stretch the conceptual and theoretical boundaries of both environmental and mainstream sociology, to highlight the relevance of sociological research for environmental policy and management, to disseminate the results of sociological research, and to engage in productive dialogue and debate with other disciplines in the social, natural and ecological sciences.
Environmental Technology	1980-Current	Environmental Technology is a leading journal for the rapid publication of science and technology papers on a wide range of topics in applied environmental studies, from environmental engineering to environmental biotechnology, the circular economy, municipal and industrial wastewater management, drinking-water treatment, air- and water-pollution control, solid-waste management, industrial hygiene and associated technologies.
Ethics, Policy & Environment	1998-Current	Ethics, Policy & Environment offers scholarly articles, reviews, critical exchanges, and short reflections on all aspects of environmental ethics, environmental philosophy, and the normative dimensions of environmental policy.

Geomatics, Natural Hazards and Risk	2010-2016	Geomatics, Natural Hazards and Risk publishes papers that deal with new concepts, approaches and case studies using geospatial (GIS and GPS) and remote sensing techniques to study monitoring, mapping, risk management and mitigation, risk vulnerability and early warning of natural hazards. All types of natural hazards associated with land, ocean, atmosphere, land-ocean-atmosphere coupling and those induced by climate change are considered. The journal also focuses on the emerging problems related to multi-hazard risk assessment, multi-vulnerability risk assessment, risk quantification, the economic aspects of hazards, visualization and communication.
International Journal of Biodiversity Science, Ecosystem Services & Management	2005-Current	The International Journal of Biodiversity Science, Ecosystem Services & Management (IJBESM) aims to improve our understanding of the role of biodiversity in providing ecosystem services and of the management systems needed to maintain biodiversity and achieve sustainable use of ecosystem services.
International Journal of Environmental Studies	1970-Current	International Journal of Environmental Studies has been pre-eminent in its field. The environment is understood to comprise the natural and the man-made, and their interactions; including such matters as pollution, health effects, analytical methods, political approaches, social impacts etc. Papers favouring an interdisciplinary approach are preferred, because the evidence of 40 years appears to be that many intellectual tools and many causes and effects are at issue in any environmental problem - and its solution.
International Journal of Sustainable Development and World Ecology	1994-Current	The primary focus of the journal, and is addressed by papers in environmental sustainability, economic sustainability, and/or social and cultural sustainability.
International Research in Geographical & Environmental Education	1992-Current	This focus is especially welcome because environmental problems, theories, and solutions occur within specific geographical contexts.
Journal of Natural Resources Policy Research	2008-2015	The journal addresses a broad range of natural resource fields including implications and perspectives of natural resource allocation, planning and management. We are looking for papers based on original research focusing on policy, water, minerals, energy, fisheries and forestry in a synthesizing fashion, rather than stand-alone specialty areas. The journal also publishes papers on the natural resource implications of climate change, natural disasters and biodiversity loss, among others.
Journal of Sustainable Forestry	1992-Current	Journal of Sustainable Forestry publishes peer reviewed, original research on forest science. While the emphasis is on sustainable use of forest products and services, the journal covers a wide range of topics from the underlying biology and ecology of forests to the social, economic and policy aspects of forestry. Short communications and review papers that provide a clear theoretical, conceptual or methodological contribution to the existing literature are also included in the journal.
Landscape Research	1968-Current	Landscape Research is distinctive in combining original research papers with reflective critiques of landscape practice. Topic areas include : environmental design, countryside management, ecology and environmental conservation, land surveying, human and physical geography, behavioural and cultural studies, and archaeology and history.
Local Environment : The International Journal of Justice and Sustainability	1996-Current	Local Environment: The International Journal of Justice and Sustainability is a refereed journal written by and for researchers, activists, non-governmental organisations, students, teachers, policy makers and practitioners. It focuses on sustainability planning, policy and politics in relation to theoretical, conceptual and empirical studies at the nexus of justice and the environment. It is an inclusive forum for diverse constituencies and perspectives to engage in a critical examination, evaluation and discussion of the environmental, social and economic policies, processes and strategies which will be needed in movement towards social justice and sustainability - "Just Sustainabilities" - at local, regional, national and global

		scales. We are particularly interested in submissions based on critical research and practical experience from nations and continents representing different levels of income and industrial development and from countries in transition in order to engage in mutual learning and understanding.
Planning & Environmental Law: Issues and decisions that impact the built and natural environments	1949-2014	Formerly known as Land Use Law & Zoning Digest (1974-2003) & Zoning Digest (1948-1973)
Plant Ecology and Diversity	1844-Current	Plant Ecology and Diversity is an international journal for communicating results and novel ideas in plant science, in print and on-line, six times a year. All areas of plant biology relating to ecology, evolution and diversity are of interest, including those which explicitly deal with today's highly topical themes, such as biodiversity, conservation and global change.
Weatherwise	1948-Current	Weatherwise features fascinating articles and spectacular color photographs that showcase the power, beauty, and excitement of weather. Weatherwise articles present the latest discoveries and hottest issues in meteorology and climatology and focus on the relation of weather to technology, history, culture, art, and society. In each issue, our expert columnists answer reader questions about the weather; discuss current events and people in the news; review new weather-related books and videos; test reader forecast skills with analysis of weather maps; and summarize recent weather events in the United States and Canada.

RESEARCH

Development Studies Research	2014-2016	Development Studies Research (DSR) is a multidisciplinary journal providing an interdisciplinary platform for original, critical research. The journal aims to broaden understandings of current development studies research, open up new areas of debate, reflect on and advance development theory, identify problems of policy and practice, and present potential solutions and recommendations to the development community, private sector and conservationists.
Journal of Urbanism: International Research on Placemaking and Urban Sustainability	2008-Current	The Journal of Urbanism is a multi-disciplinary journal that focuses on human settlement and its relation to the idea of sustainability, social justice and cultural understanding. It is concerned with the relative impact of design on environmental perception, urban livability and the experience of space.
Planning Practice & Research	1986-Current	Planning Practice & Research (PPR) has established itself as the source for information on current research in planning practice. It is intended for reflective, critical academics, professionals and students who are concerned to keep abreast of and challenge current thinking. PPR is committed to: (1) bridging the gaps between planning research, practice and education, and between different planning systems, (2) providing a forum for an international readership to discuss and review research on planning practice, (3) the critical evaluation of practice and the progressive search for practical guidance, and (4) presenting research in an accessible, succinct style, not overly theoretical, but analytical.
Urban Policy and Research	1982-2016	Urban Policy and Research is an international journal dedicated to the publication of refereed articles in English in the field of urban studies and urban policy for those with an interest in Australia, New Zealand and the Asia Pacific region. The scope of the journal is international in two senses: it presents to a worldwide readership a view of the urban policies of particular countries; and it encourages dialogue among researchers, policy makers and practitioners in the region.
Urban Research & Practice	2008-Current	Urban Research & Practice is a well-established and exciting journal that publishes a wide range of original academic research articles along with innovative articles on policy and practice. The journal is published in association with EURA (European Urban Research Association), is a cross-disciplinary journal, with a focus on urban policy.

REAL ESTATE/HOUSING

International Journal of Housing Policy	2001-Current	International Journal of Housing Policy is a leading forum for the critical analysis of housing policy, systems and practice from a social science perspective. The journal essentially seeks to place housing policies and practice in the context of other public policies and to link developments in housing with broader social, economic and political change.
International Journal of Strategic Property Management	2004-Current	International Journal of Strategic Property Management is a peer-reviewed, interdisciplinary journal which publishes original research papers. The journal provides a forum for discussion and debate relating to all areas of strategic property management. Topics include, but are not limited to, the following: asset management, facilities management, property policy, budgeting and financial controls, enhancing residential property value, marketing and leasing, risk management, real estate valuation and investment, innovations in residential management, housing finance, sustainability and housing development, applications of information technologies in property management, mathematical methods in property management, international comparisons and developments, theoretical and conceptual frameworks for strategic property management, etc.
Journal of Economic Policy Reform	1996-Current	Journal of Economic Policy Reform prioritises the publication of papers that offer new empirical or theoretical insight into the most pressing economic policy issues of our times. Of particular interest are papers that deal with policy working across more than one country, such as a region, a group of countries or internationally.
Journal of Property Research	1984-2016	Journal of Property Research is an international journal of research, particularly applied research, into property investment and development.
Housing Policy Debate	1990-Current	Housing Policy Debate provides an outlet for cutting edge, original research that informs U.S. housing and community development policy. Subjects include affordable housing, neighborhood revitalization, housing related poverty alleviation and integration strategies, and metropolitan development trends. The journal also aims to explore linkages between housing policy and finance, energy, environmental, and transportation policies.
Housing Studies	1986-Current	Housing Studies is the leading international journal and a major forum for theoretical and analytical developments in the housing field.
Housing, Theory and Society	1984-Current	Housing, Theory and Society regards housing as a research topic embedded in wider social, cultural, and economic issues. The journal accordingly aims to develop housing research as a theoretically sophisticated field spanning the diverse academic and professional disciplines concerned with such issues. It encourages innovative intra- and multidisciplinary research and academic debate on all aspects of housing as it intersects with social, cultural, economic and behavioural phenomena, including but not limited to aging, child development, consumption, education, employment, environmental quality, gender, homelessness and deprivation, local participation, market forces, neighbourhoods, politics, public health, social policy, urban issues and welfare provision.
Pacific Rim Property Research Journal (PRPRJ)	2000-2016	The Pacific Rim Property Research Journal (PRPRJ) is the official refereed journal of the Pacific Rim Real Estate Society (PRRES Inc.). The journal publishes applied property research relating to all aspects of property and invites contributions addressing areas including, but not limited to, the following: • Property market dynamics • Modelling property markets • Modelling property markets • Property valuation • Property cycles • Housing markets and policy issues • Property and IT • Property management • Corporate real estate • International property • Property development • Property investment and finance • Property education

TRANSPORTATION

Journal of Intelligent Transportation Systems: Technology, Planning, and Operations	1993-Current	The Journal of Intelligent Transportation Systems is devoted to scholarly research on the development, planning, management, operation and evaluation of intelligent transportation systems. Intelligent transportation systems are innovative solutions that address contemporary transportation problems.
Journal of Transportation Safety & Security	2009-Current	Journal of Transportation Safety & Security provides a discussion forum for the exchange of academic ideas, data, and integrated transportation safety solutions developed through engineering research in multimodal transportation safety arenas. The journal is supported and directed by an international editorial board of renowned experts in all modes transportation safety.
Mobilities	2006-Current	Mobilities examines the large-scale movements of people, objects, capital, and information across the world, as well as more local processes of daily transportation, movement through public and private space and the travel of material objects in everyday life. New transportation and digital infrastructures and novel social and cultural practices pose important challenges for coordinating and governing mobilities and for mobility rights and questions of 'access'. These 'mobility' issues have generated new research methods and theories. Mobilities publishes original, theoretically-informed research which is international in scope. The journal addresses major topical issues and fosters scholarly debate around the 'mobility' turn.
Structure and Infrastructure Engineering - Maintenance, Management, Life-Cycle Design and Performance	2005-Current	Structure and Infrastructure Engineering - Maintenance, Management, Life-Cycle Design and Performance is an international Journal dedicated to recent advances in maintenance, management and life-cycle performance of a wide range of infrastructures, such as: buildings, bridges, dams, railways, underground constructions, offshore platforms, pipelines, naval vessels, ocean structures, nuclear power plants, airplanes and other types of structures including aerospace and automotive structures.
Transport	2002-Current	Transport publishes articles in the fields of transport policy, fundamentals of the transport system, technology for carrying passengers and freight using road, railway, inland waterways, sea and air transport, technology for multimodal transportation and logistics, loading technology, roads, railways, airports, ports, pipeline transport, industrial and technological transport, agricultural motor vehicles, traffic safety and environment protection, design, manufacture and exploitation of motor vehicles, transport energetics, fuels, lubricants and maintenance materials, teamwork of customs and transport, insurance, transport information technologies, transport economics and management, transport standards, transport educology, transport history, etc.
Transport Reviews	1981-Current	Transport Reviews is an international review journal covering all aspects of transport. It provides authoritative and up to date research-based reviews of transport related topics that are informative to those that are knowledgeable in the subject area. It also provides a means by which experts from different backgrounds can find out about the subject area, so the papers should be accessible to a wide ranging readership.
Transportation Letters	2009-Current	The focus of Transportation Letters is on analytical and empirical findings, methodological papers, and theoretical and conceptual insights across all areas of research. Review resource papers that merge descriptions of the state-of-the-art with innovative and new methodological, theoretical, and conceptual insights spanning all areas of transportation research are invited and of particular interest.
Transportation Planning and Technology	1972-Current	Transportation Planning and Technology places considerable emphasis on the interface between transportation planning and technology, economics, land use planning and policy.
Transportmetrica A : Transport Science	2005-Current	Transportmetrica A : Transport Science provides a forum for original discourse in transport science. The international journal's focus is on the scientific approach to transport research methodology and empirical analysis of moving people and goods. Papers related to all aspects of transportation are welcome. A rigorous peer review that involves editor screening and anonymous refereeing for submitted articles

		facilitates quality output.
Transportmetrica B : Transport Dynamics	2013-Current	Transportmetrica B is an international journal that aims to bring together contributions of advanced research in understanding and practical experience in handling the dynamic aspects of transport systems and behavior, and hence the sub-title is set as “Transport Dynamics”.
Urban, Planning & Transport Research	2013-Current	Urban, Planning & Transport Research is a fully Open Access journal offering rapid publication and wide dissemination of new research to a global audience. It publishes peer-reviewed contributions in all areas of urban, planning and transport research.
WATER/COASTAL MANAGEMENT		
Coastal Management	1973-Current	Coastal Management is a peer-reviewed, applied research journal dedicated to exploring the technical, applied ecological, legal, political, social, and policy issues relating to the use of coastal and ocean resources and environments on a global scale. The journal presents timely information on management tools and techniques as well as recent findings from research and analysis that bear directly on management and policy.
International Journal of River Basin Management	2003-Current	The International Journal of River Basin Management addresses this need. It brings together research dedicated to all aspects of integrated river and floodplain management including catchments, wetlands and estuarine systems.
International Journal of Water Resources Development	1983-Current	International Journal of Water Resources Development is a policy and practice-oriented Journal that covers all aspects of water resources policy, management, development and governance. It is an interdisciplinary journal that focuses on water resources and their economic, financial, social and environmental-related impacts. Contributions which include the interdependences and inter-linkages between the water and the agricultural, energy, industrial and health sectors in both developed and developing countries, both at present and in the future, are welcome.
Lake and Reservoir Management	1984-Current	Lake and Reservoir Management (LRM) publishes original, previously unpublished studies relevant to lake and reservoir management. Papers address the management of lakes and reservoirs, their watersheds and tributaries, along with the limnology and ecology needed for sound management of these systems.
Water International	1975-Current	Water International is the official journal of the International Water Resources Association (IWRA), founded in 1972 to serve as an international gateway to the people, ideas and networks that are critical to the sustainable management of water resources around the world.
